

Central Idea

Our body is made up of interdependent systems which are affected by the choices we make.

Who we are

Unit Of Inquiry:

Health coach visit!

This week a health coach visited ISLQ. It was on a Monday morning. All the year 6's were gathered in the hall at the desks we eat on. We had lots of magazines, colour pencil, glue sticks and scissors. First of all the teachers gave out A3 pieces of paper to every student. The papers were for us to stick pictures on. We had to find pictures that had to do with health or they picked pictures we inspired ourselves. It was a bit hard but it was worth it. Some of them picked pictures we needed to write down why we picked them. Some people presented their posters and showed them to the year reporter's opinion it was a lot of fun. A boy in 6g called Sam and creative project and I really enjoyed it." Finally all students brought their A3 piece of paper home and showed it to their parents and back. In this reporters opinion the activity we did with Ms. Nicole (the health coach) was fun and important. "If there is nothing that has to those magazines find something that inspires you," said Ms. said "When Ms. Nicole came, we had lots of FUN!!!"

six students. In the dents took their then brought it Nicole (the health do with health in Nicole. Adriana

SUMMATIVE ASSESMENT

There are 5 different groups, the skeleton group, the respiratory group and the present it to our parents and some of the opinion this will need to be very work hard. Asma said, "I hope the groups many new things." They will present reporter's opinion I think that the be really good because everyone is as a team.

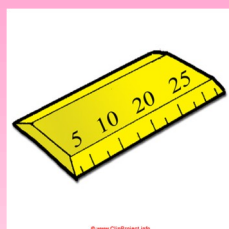

group, the muscular group, the digestive cardiovascular group. We are going to students in our school. In this reporters organized and the groups will have to will finish at the right time and learn their presentation in the hall way. In this summative assesment will turn out to working together

Maths:

Length, capacity and weight

In year 6 during math there are still mm into km, so Mr. Glover de-the front tables, and the second people that do not understand at why Miss. Williams gave some harder questions for the back tables. I am on the back tables and I am fine there but I also wish that whoever is at the front comes to the back. Mr. Glover should make so people that are at the back tables come to the front and help whoever did not understand. On 1st of December we played a measure game to learn and have fun at the same time. " I think the game we played was fun but wasn't fair because Abdulla's team won many times"

some people that do not understand how to transfer 3.86 cided to split us up into two groups; the first one was at one was at the back tables. At the front tables are the the back tables are the people that understand. This is back tables and I am fine there

Mathletics

Last week on Thursday the 24th of November 2010 the ISLQ year 6 students got their Mathletics sign in details. ISLQ have tried Mathletics before and I have heard the students really liked it. Mathletics is a math game online where you can play live against other schools or take tests from various math subjects. ISLQ have now bought Mathletics and are enjoying playing it after school every day. In the opinion of the reporter it is extremely fun and is a great activity. A boy in year 6g named Nikola says this "I love Mathletics it's really fun and gives me a challenge sometimes."

Language:

We are doing in language grammar and capital letter and full stop.

Last Week:

On November 24th, the years 5 & 6 boys went to Dukhan International School for a football tournament. Out of 18 schools they came in 9th and didn't let any goals in for 4 matches. Well done boys!

6R had an art lesson with Miss Rehu, the year 3 teacher. She taught us about how to make different colors lighter and darker using oil pastels and crayons. We will continue with this this week.

Events

In ISLQ:

Last week:

Last week we had a whole primary assembly in ISLQ. We had it because we wanted to show what we were doing in the classroom. Two to four children from each class presented something they made in their class. Like in Year 4 they did timelines about themselves and wrote why each timeline was important. From Year 6 Sareth, Noorin and Amatallah performed their poem and report on Activity Day.

The cross country tryout was last week and it was great. Mr. Opperman made the runners go around the school 3 times. Most of the students did well but only 20 made it to the team. At the end, everyone was exhausted. The race is 2km and the guys who made it have started practicing already. Good luck guys. Year 5 went to Souq Waqif on 22/11 for their unit on exploration. There are many places there and I am sure Souq Waqif had many people. I'm sure they enjoyed it.

This Week:

The girl's football team from years 5 & 6 went to the American School to play matches for the tournament on Sunday the 28th of November. We played against lots of other schools. There were fourteen schools and some of them were DES, Qatar Academy and ASD. We scored twelve goals and we came in second place out of fourteen schools! We also got silver medals.

All the year 6 students had a photo taken together because we sent the money we raised from Activity Day to Africa and they can see who sent it.

This week, on the 29th of November, we had a guest speaker that helped us for 'Our Body Systems' unit. Her name is Ms. Nicole and she works as a health coach. We cut loads of pictures of people who are fit and healthy from different magazines and glued them on a nice, big paper which we called our vision board. We also had to tell why we chose them as our role models and discuss it with our parents. It was such a lovely, knowledgeable, great and fun time.

6G's pet turtle getting stuck in its tank and a tiny who bought him

We all loved it. Nibbles died by between a wall from bridge. The owner buried him in the school playground on Tuesday Nov.30th. Poor Nibbles!!!

Next week:

Next week we are having a book fair in ISLQ. There will be loads of books for sale. The fair will be from December 5th to the 9th. It is in the hall of our school.

Events

In the community:

This week:

On December 2nd the FIFA officials will announce the venue of the World Cup 2022. Qatar has had a bid in for over a year now, so there will be lots of crossed fingers (and legs) at the announcement. There were many countries who put a bid in like South Korea, Australia, the U.S.A. and Japan. Those countries are trying to have the World Cup in their countries. Let's hope Qatar has lived up to its dream of becoming the new Middle East tourist hub.

REMINDERS:

REMEMBER THESE THINGS!

Remember to bring in your child's ski trip form if they would like to go. Always bring your hat, water to school.
Bring in healthy snacks.
Always bring your recorders to music.

There will be a ski trip going to Switzerland from ISLQ. Years 6's are allowed and they have to pay 9,000 riyals; 3,000 now and 6,000 later. They will be going in February 2011 for 8 days. You have to be quick because the first ones who reserve the seats get to go. There are 8 seats but 5 are booked. Thursday, 2nd December 2010, is the last day. Also there will be a big dinner and talent show in March in ISLQ. If you can dance, sing, read a poem, do gymnastics or have other talents you might be able to perform. Audition forms are with Mrs. Page and they will start next week. Solos and groups are okay and in any language. Good luck to those who want to go!

On December 1, 2010 around 7:00 am, a truck exploded at the roundabout near ISLQ
